

How to make bubble mixture

- 50ml washing-up liquid (one part)
- 300ml water (six parts)
- Glycerine (optional)
- Bubble wand (optional pipe cleaner, paper clips, straws)

1. Measure the washing-up liquid into a container.

2. Slowly add in the water and gently stir, being careful not to create too many bubbles at this stage.

3. If you can let the bubble mixture rest over night, as it will make your bubbles even better.

Adding 1 tbsp Glycerine will also make the bubbles last longer.

4. When you're ready, dip your bubble wand into the mixture and start blowing bubbles!

If you haven't got a bubble wand, bend a pipe cleaner, paperclip or straw into shape.
